Summary

Creative Developer with 2 years facilitating and supporting human interactions with complex systems and software. Maintains user-centric designs while adhering to prescribed interface principals and related development goals. Dedicated to creating inviting and unintimidating interfaces for everything from simple open-source applications to complex proprietary systems.

Also, skilled and innovative specializing in front-end development. Known for excellent problem-solving abilities and a keen eye for detail, I am passionate about leveraging the latest web technologies to create scalable and maintainable solutions that drive digital transformation

Work History

Web Development | Associate UI Designer

Freelancer , Remote January 2022 - Till Date

- Developed a deep understanding of user personas, creating tailored designs that catered to the specific needs of each target audience segment.
- Experienced in working with agile methodologies, adapting quickly to changing project requirements while maintaining focus on quality deliverables.
- Sought out opportunities for professional development by attending conferences, workshops, and online training courses related to UI design and industry trends.
- Created visually compelling designs, including logos, branding materials, marketing collateral, and website layouts, tailored to clients' branding guidelines and target audience
- Designed and developed custom websites and web applications using HTML, CSS, JavaScript, and other front-end technologies, focusing on responsive design principles and user experience optimization
- Provided training and ongoing support to clients on website management, content updates, and basic troubleshooting, empowering them to maintain and evolve their online presence effectively.
